

NEWS ALERT

Cortec® VpCI®-148 Featured in December Issue of BioCycle Magazine!

RECYCLABLE CORROSION- RESISTANT PAPER

Cortec has introduced VpCI®-148, a grease resistant, corrosion inhibiting paper comprised of biobased materials.

Unlike wax or polycoated papers, VpCI-148 paper contains a biobased coating and is fully recyclable and repulpable. It is made from natural Kraft paper, and is also fluorochemical free. Typical appli-

cations are protection of products for storage and shipment that require lubrication (such as bearing and metal parts). www.cortecvci.com
