## Cortec® Asia Pacific Meeting Concludes in Gangnam Style!

Cortec® is pleased to announce record attendance for its Asia Pacific Meeting held in Jeju City, Korea. The meeting included over 50 participants from over a dozen countries and focused on sharing of technical success and global best practices, while celebrating the record sales growth in the region.

In the past two years, Cortec® preservation products and services have been used on many infrastructure, oil/gas, heavy industrial, automotive, and manufacturing projects throughout Asia Pacific. In total, well over \$1 billion USD in client assets have been preserved turn-key in the last six months alone, where Cortec® provides the “supply and apply” service. Much of the technical program was focused on the logistics and technical development to prepare for the next 10 years’ worth of exponential growth in key sectors in the region.

Following technical training, case studies, and strategic discussions, Cortec® Korea branch office hosted plenty of entertainment and sightseeing to the many natural wonders that Jeju provided. Not the least of which was Cortec’s version of Gangnam Style karaoke!

Cortec® wishes to thank all attendees and award winners on their accomplishments and a special thank you to the hosts—the Cortec® Korea branch office team for a wonderful experience for all!

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries.
