MICHIGAN CHAPTER TALKS MEMBERSHIP AND CORROSION

The Michigan Chapter recently hosted a very successful dinner meeting at the Greektown Casino Hotel in Detroit, MI. Forty participants attended the event. Steve Rose, 2011 Chapter President, provided an update on the events planned for 2012. He also explained the development of two new incentive programs that will be launched to increase membership and meeting participation. Rose commented, "We have an active group of participants, yet we plan on getting the word out about the educational and networking benefits ICRI can provide to an even greater population in Michigan."

The keynote speaker for the night was Matt Drew, Technical Sales Representative, Cortec Corporation. Drew provided an overview of how corrosion generates in concrete and the various inhibitor methods used to repair and restore corroded infrastructures. The question-and-answer portion of the presentation attracted many questions about cathodic protection, which Drew was able to answer. The meeting concluded with a raffle drawing of all registered guests that attended. New Board member Eric Wood was the winner of \$100 of Greektown Casino chips.
