

NEWS ALERT

Corpac Electrifies Pack&Move 2012!

Corpac exhibited Cortec's VpCI® protection system and wide range of products at Pack&Move in Basle, Switzerland November 20-23, 2012. Held in conjunction with PRODEX, the International show for Machine Tools, Tools, & Production Measurements, and SWISSTEC, the exhibition for the Supplier Industry, this 4 day exposition showcased Integrated Logistics Solutions and Packaging Technology. The event showed a significant increase in attendance compared to 2010, attracting 63,000 visitors over the expo's duration.

Corpac, an established & well known Cortec® distributor, showcased the line of high performance VpCI® products for electrical/electronic applications. Visitors and customers who visited the Corpac booth were especially interested in the many possibilities and opportunities Cortec's product will bring. After tough economic times for Switzerland's metal & machining industry following the Swiss Franc crisis, it is especially important to be present at exhibitions. Despite European finance worries, Corpac will continue its event attendance, exhibiting at Verpackung Schweiz 2013 in Zurich, Switzerland in April and back at Pack&Move In November of 2014.

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001, ISO 14001, and ISO 17025 Certified.
