

NEWS ALERT

Cortec's M-605 PS Awarded BioPreferredSM Labeling!

Cortec[®] is pleased to announce that M-605 PS has been awarded BioPreferredSM labeling. The USDA BioPreferredSM program is a standard for identifying biobased products or packaging. More detailed information on the USDA BioPreferredSM program and resources are available at: www.biopreferred.gov

M-605 PS is an environmentally friendly corrosion inhibitor designed specifically as an additive to prevent corrosion due to chlorides. M-605 PS conforms to Pacific North West States (PNS), Department of Transportation, requirements to additives for deicers and pass their corrosion tests when added to a deicer at concentration level of 5% by weight. It can also be used in closed loop cooling systems containing brine solutions. M-605 PS provides protection to ferrous and aluminum-based alloys; is non-toxic, and contains no chromate, nitrite, or phosphate inhibitors.
