Cortec[®] MCI[®] Wall Defense Featured in March Issue of Coatings Pro Magazine!

Protecting Against Graffiti

Cortec's new MCI Wall Defense is a clear, silicone elastomer-based anti-graffiti coating that can be applied to exterior concrete, masonry, or metal surfaces. MCI Wall Defense is designed to be used over various types of coated or uncoated surfaces. Any graffiti can be immediately removed with a cold-water pressure cleaning, and since the coating is permanent, there is no need to reapply after graffiti removal like alternative sacrificial systems. The product is an ideal choice for protecting the nation's roadways, bridges, railcars, and other publicly or privately owned spaces from painted vandalism. For more information, contact: Cortec, (800) 426-7832, www.cortecvci.com
