Bionetix Bio-Tab 1T: Enhance Water Biology in Septic Systems!

A poorly maintained septic tank can lead to many headaches and costly service calls. Over time, inert solid materials build up in the bottom of your septic tank forming a layer of sludge. To keep your septic system healthy and functioning, this undigested sludge should be treated regularly with Bionetix Bio-Tab 1T. Each tab contains a 1 Trillion count of bacteria as well as enzymes effective in aerobic and anaerobic conditions. Biological nutrients and stimulants enhance the water biology in your tank by aiding bacteria to biodegrade organic material comprised of proteins, fats, carbohydrates, and toilet paper. Bionetix Bio-Tab 1T is especially efficient after toxic shock such as the use of strong bleaches or other harmful chemicals like root killers for removal of roots in pipelines.

Septic system maintenance with Bionetix Bio-Tab 1T can:

- Reduces septic tank pumping frequency
- Improves pipe purification
- Reduce sludge
- Improve drain seeping
- Reduce odors and methane production
- Prevent pipe and drain blockage

Using Bionetix Bio-Tab 1T will keep your septic system healthy and functioning properly.

- Nourishes after shocks of bleach agents and detergent
- Does not attack plastic or metal pipes
- Replaces chemical products
- Biodegrades paper, oils, greases, and waste faster

Septic tank maintenance with Bionetix Bio-Tab 1T is simple; add two tabs to your tank in the first month, followed by one tab every month for maintenance as well as one tab after any toxic treatment to ensure a healthy septic system.
