PRESS RELEASE

Bionetix International - The Most Natural Way for Water Treatment Applications – Finally Available in Europe!

Bionetix International; headquartered in Montreal, Canada is a wholly owned subsidiary of Cortec® Corporation in the business of manufacturing microbial based bio-products. It is comprised of solid, proprietary technologies to produce biological waste treatment products that are used in thousands of applications and various industries throughout the world.

Powders are free flowing colored granular, which contains microorganisms grown on a bran base in a deep fermentor tank and then stabilized.

Bionetix liquids are grown in a deep fermentor tank and preserved in the liquid phase.

The purpose of Bionetix products is to degrade target substances in waste systems by using natural methods and develop environmentally safe manufacturing and disposal processes.

Capability of microorganisms to transform pollutants and synthetic chemicals into sources of energy and raw materials for their own growth proves that expensive chemicals can be replaced with biological processes that are lower in cost, more efficient, and perfectly safe for the environment!

Our integrated resources will provide customers with unique benefits of remediation and bioaugmentation. Bacteria used in the Bionetix line of products degrade more complex chemicals along with higher volumes of waste materials.

Bionetix products are excellent in maintaining the clarity of fish farms which is often difficult, especially in warm weather, due to excess suspended solids.

Bionetix protects septic system from toxic chocks coming from harsh chemicals used as cleaning agents while reducing pumping frequency due to its enhanced organic material breakdown.

With this acquisition, Cortec[®] is strengthening its position in the marketplace as leader in the field of modern green technologies and development of environmentally safe solutions for every facet of industry.

Cortec[®]/Bionetix alliance is a wonderful opportunity for our teams to focus on market needs, scientific collaborations, and providing anyone from household to manufacturing with the best quality bio-products on the market.

Bionetix has a wide range of products for numerous applications that can be divided in 5 major fields:

- **Industrial Waste Treatment** - Treatment of wastewater on site prior to discharge to sewage. Bacteria specifically selected to degrade target substances in waste water systems, like fats and oils, food, beverage and alcohol.
- **Municipal Waste Treatment** - Enhances waste treatment in municipal wastewater. Reduces organic acids, ammonia and toxic substances, controls odor. Increases treatment efficiency. Reduces plant upsets from shock.
- **Institutional and Household Market** - Biological cleaners and janitorial applications, grease trap treatment, urinals, odor removals, disinfectants and septic tank treatment.
- **Concentrates and Additives** – Green formulations of concentrated biological cleaning solutions
- **Agricultural Treatments** - Grow higher quality crops...have greener fairways and reduce impacts on land and dependency on chemicals and reduce input costs.
