PRESS RELEASE

CorShield® VpCI® Transit Coating –Superior, Environmentally Safe Replacement for Hazardous Corrosion Preventives!

CorShield® VpCI® Transit Coating is an environmentally friendly, water-reducible concentrate designed as a complete replacement for hazardous oil-based corrosion preventives. This economical and excellent performance coating is safe to apply and easy to remove if necessary.

CorShield® VpCI® Transit Coating provides excellent corrosion protection to all kinds of farm equipment.

CorShield® VpCI® Transit Coating forms emulsion in water and is applied to metal surfaces by spraying or dipping. The wide dilution range with water allows flexibility to customize the length of protection required vs. applied cost. Unique vapor phase action protects uncoated and difficult-to-reach areas.

The protective coating is also translucent and in ambient conditions becomes dry-to-touch 30 minutes from application. It forms a clear and dry film, which gives an attractive appearance to protected parts.

CorShield® VpCI® Transit Coating can be easily removed with VpCI®-414 or other conventional alkaline cleaners.

The product is designed to protect ferrous and non-ferrous metals in sheltered areas, indoors, or in packaging with no direct exposure to rain or outdoor elements. It is also an excellent temporary coating for painted surfaces.

CorShield® VpCI® Transit Coating is heat stable, displaces water from metal surfaces, eliminates cleaning and housekeeping problems associated with oil, and provides superior protection and complete replacement for rust-inhibiting oils.

CorShield® VpCI® Transit Coating forms a clear and dry film, which gives an attractive appearance to protected parts.

Due to its economical application the product can be diluted up to 1 part CorShield® VpCI® Transit Coating to 10 parts water. It contains zero VOCs.

Metals protected are carbon and stainless steel, cast iron, aluminum, copper, and alloys.

Typical applications:

- Vehicles
- Tractors
- Cars
- Off-road equipment
- Airplanes
- Military equipment
- Motorcycles
- Farm equipment

CorShield® VpCI® Transit Coating was tested according to ASTM D-1748, D-1735 and B-117.
