PRESS RELEASE

CorrLube® Food Grade Lubricant - Safe on Food, Beverage and Pharmaceutical Equipment, Tough on Corrosion and Wear!

CorrLube® Food Grade Penetrant is a multi-purpose, light duty, non-toxic, lubricating oil, developed by Cortec® laboratories, that contains only USDA H-1 approved ingredients.

This deep penetrating formulation attacks rust to free the frozen parts and can be applied on machinery where incidental contact with food may occur, without any danger of food intoxication.

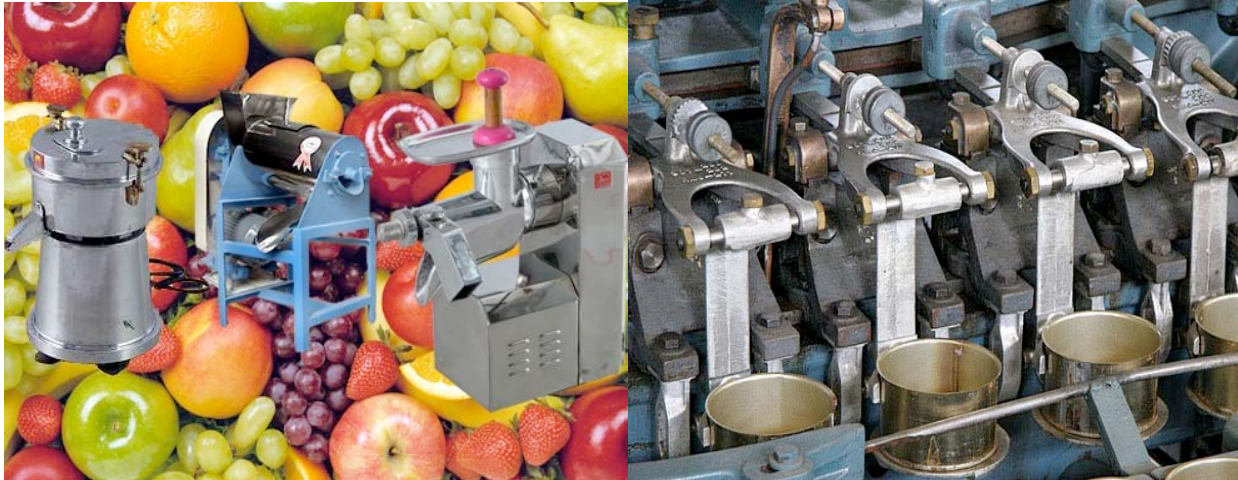

H-1 rated, CorrLube® Food Grade Penetrant lubricating oil is safe and simple to apply to areas where contact with food may occur, making it an ideal choice for all kinds of food processing plants and facilities

CorrLube® Food Grade Penetrant has a very low surface tension on the water-oil-metal-air interfaces, which provides complete surface coverage and water displacement.

This product penetrates quickly to free rusted or corroded fasteners and facilitates easy operation of air-actuated pins and guides. CorrLube® Food Grade Penetrant serves as an excellent anti-corrosion film on equipment during idle periods.

Additionally, CorrLube® Food Grade Penetrating lubricant contains an H-1 approved bacteriostatic preservative. This preservative retards the growth of bacteria which is often present in conventional lubricants used in food and beverage processing plants

Hazardous corrosion preventatives may cause serious food intoxication. With CorrLube® Food Grade Penetrant, the customer will get excellent and safe corrosion protection, eliminating bacteria and other unwanted consequences.

Because of H-1 approval, CorrLube® Food Grade Penetrant can be applied on machinery where contact with food can occur as well as federally inspected meat and poultry plants, beverage, and other food processing facilities.

CorrLube® Food Grade Penetrant:

- **Quickly frees corroded parts**
- **Protects metal from corrosion**
- **Lubricates moving parts**
- **Retards bacteria growth**
- **Economical application**

This product was tested according to ASTM D-97, D-1748, D-130, D-971, D-445, D-2161 and is RoHS compliant.
