PRESS RELEASE

CorroLogic™, The Blueprint of Cortec® CEFS Custom Engineered Corrosion Solutions!

Cortec's Engineering & Field Services (CEFS) has published CorroLogic™, a new brochure summarizing the blueprint of its innovative VpCI® corrosion inhibitor processes. This brochure provides the perfect platform to showcase the range of systems, services, and products CEFS has developed for custom engineering corrosion solutions for many applications and environments. It is a real asset, creating the opportunity for our partners to better understand what CEFS can do to mitigate corrosion obstacles across a wide range of industries.

Cortec® CorroLogic™ VpCI® System for Carrier Pipe Corrosion Control

CorroLogic™ is a powerful communications tool that distinguishes Cortec® CEFS as the outstanding firm to implement the proper procedure to prevent deterioration of valuable assets. This new brochure gives companies an invaluable introduction to the

CorroLogic™ methods, how they work, and the benefits they can bring. It covers the resources to combat corrosion in Above Ground Storage Tanks (AST), Insulated Pipe (CUI), Pipeline Casings (CPC), Fire Suppression Equipment Corrosion Inhibition (FSI), and Top of the Line (TOL) Corrosion Protection of Pipelines. CEFS is dedicated to meeting customer demands in the most efficient and profitable way. Keep looking for more novel approaches to be added to the CorroLogic™ line to battle damage or loss to your infrastructure.

Pipeline section shows active VpCI® protection at the liquid phase, vapor phase, and the interface, partition and emulsion barriers

The CorroLogic™ brochure and other information regarding CEFS can be found at this link:
