PRESS RELEASE

Cortec's Eco Tire Duragloss: High Gloss Shine Without Solvent Or VOCs!

Nothing gets noticed more quickly than glossy tires, and Eco Tire Duragloss is the best way to highlight a great looking vehicle. Not only does Eco Tire Duragloss provide tires with a new shiny look, it also contains UV inhibitors to prevent cracking, fading, and hardening of tires over time. This environmentally friendly product does not contain any solvents or harmful ingredients. It goes on easily with a thick water-based formula to minimize "tire sling" and prevent damage to the vehicle's paint. Eco Tire Duragloss' durability outlasts the average tire dressing by providing a deep, black, wet look for weeks. This product is available in 16oz. bottles with adjustable spray pattern in EcoAir® – an aerosol alternative packages and 5 or 55-gallon containers.

Photo: Before and After Application

- Easy to apply
- Durable
- Available in EcoAir® packages, which does not require the use of flammable propellants
- Provides your tires with the ultimate high gloss wet look
- Doesn't require a buffing application
