PRODUCT RELEASE

Bionetix International Announces Its New Fire Damage Deodorizer!

Bionetix International introduces its latest new product “Fire Damage Deodorizer”; a ready to use, highly effective blend that destroys odors and removes soot stains created from smoke and fire damage. The components in this formulation include a safe to use encapsulating agent to block odor and bacteria to breakdown the odor causing compounds. Bionetix concentrates these good bacteria to produce the most complete remediation of smoke and soot stain, excellent for use on textiles such as clothing, upholstered furniture, carpets, and draperies. Fire Damage Deodorizer gets into tight pores where smoke can permeate and become trapped. Smells are permanently eliminated not masked; the bacteria present make this a high performance deodorizer that gives a fresh smell that lasts without the use of harmful fragrances.

Fire Damage Deodorizer instantly neutralizes and eliminates smoke odor leaving behind a fresh scent.

Application of Fire Damage Deodorizer liquid can be done in place of, prior to, or after soda/sand blasting. This very economical approach to fire and smoke damage remediation is easily applied with a pump sprayer. For best results, spray the product directly on all damaged surfaces -

framing, cement, brick, tile, grout, walls, ceilings, and fabrics. Application rates depend on the extent of damage and dimensions of the area to be treated at the loss site. This product can be used in homes, hotels, gyms, offices, cars, or restaurants.

Fire Damage Deodorizer

- Instantly neutralizes odor
- Long lasting effect of bacterial action
- Safe to use
- Environmentally friendly
- Non-toxic, non-carcinogenic, non-flammable, non-corrosive
- No VOCs, No CFCs, No heavy metals
- Non-staining

This very economical approach to fire and smoke damage remediation is easily applied with a pump sprayer.
