PRODUCT RELEASE

Let The Light Shine Through With Cortec's MCI® Window Protector!

Cortec® MCI® Window Protector helps glass stay crystal clear by forming an invisible protective coating. The protective layer repels rain, sleet, snow, and dramatically reduces adhesion and buildup of scale, mud, dust, insects, or road grime. This product improves visibility and decreases night glare. Simply apply this water-based product to a clean/dry window surface with a cloth; wipe glass, wait for haze, then buff. After application, the need to clean the outside of windows lessens, reducing labor costs and chemical cleaning solution and water usage.

MCI® Window Protector can be used on exterior vehicle and marine glass or windshields, or architectural glass surfaces on industrial or residential buildings. It makes cleaning easier, allowing contaminants and mineral buildup to be easily rinsed away, diminishing damage to the glass surface. The UV resistant coating forms a hydrophobic and scratch resistant layer with long lasting durability, enduring through many rinses.
