

NEWS ALERT

Cortec® EcoLine 3220 and EcoLine 3690 Featured in December Issue of IEN.

Coatings are green replacement for toxic mineral oils

As alternative to oil-based rust preventatives, biodegradable EcoLine 3220/3690 provide extended temporary protection of multimetals and are easily removed with Ecoline Surface Cleaner/Degreaser. Canola oil-based EcoLine 3220 forms tenacious film on metal surfaces for corrosion protection in storage and shipment. For marine and high humidity conditions, EcoLine 3690 replaces solvent-based rust preventatives for open-air corrosion protection. With no effect on rubber, plastics, or paints, film is self-healing and moisture-displacing. Coatings conform to NACE Standard RP0487-2000. **Cortec Corp.:** 800-426-7832; 651-429-1100 Ext. 148.
