

NEWS ALERT

Cortec's EcoDevice™ featured in June/July issue of Pollution Equipment News.

“Green” Corrosion Inhibitor

The EcoDevice™ is derived entirely from renewable materials, providing a sustainable option for corrosion protection. It protects metals in enclosed spaces, without using oils, or other chemicals that need to be removed. Each EcoDevice™ protects 1.5 cubic feet (42 L) of enclosed space, and has a profile of less than 0.03 inches (1 mm). Place inside toolbox, electrical cabinet, control panel, or other critical space for up to 24 months of corrosion protection. — Cortec Corp., 800/426-7832, www.cortecvci.com

Circle 25 on Card

Cortec® Corporation is a world leader in innovative, environmentally responsible VpCl® and MCl® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries.
