

NEWS ALERT

December 4, 2008

Cortec strives to keep it's employees safe and to comply with the OSHA laws. Please help us accomplish that by always properly labeling your chemical samples and providing Material Safety Data Sheets (MSDS).

Doing this will ensure testing can be done in a timely fashion. Unfortunately, items that are not labeled or accompanied with the correct documentation will have to be returned, which will lengthen the testing time.

Thank you for your cooperation.
