## Cortec® CorPak® Stretch Film Featured in May Issue of Spray Technologies Magazine!

### Cortec

Cor-Pak Stretch Film from Cortec helps extend the storage life of new steel aerosol cans and reduce the occurrence of scrap cans due to corrosion. Pallets wrapped with Cor-Pak can stay protected from corrosion in storage for up to a year or more. According to Cortec, new aerosol cans with rust on the neck opening cannot be used to make products as the seal will fail over time.
