Protecting process systems from corrosion has presented the greatest challenge to researchers — in economic loss and environmental safety. Now you can easily find the product to protect your process and piping systems with Cortec® technology offering highly efficient and economical corrosion protection.

www.CortecMetalworking.com

Cortec's formulations, using the newest chemical technology available, offer multimetal corrosion protection to ferrous and non-ferrous metals, including formulations that protect combinations of metals. There's a Cortec® solution whether you need temporary protection during in-plant processing, medium-term protection for shipment and storage, or extended protection for lay-up, mothballing, and field service in a variety of environmental conditions. Now you can economically and effectively protect your metals.

Corrosion of complex electrical and electronic equipment is an increasingly serious problem, causing expensive failures. Corrosion occurs during manufacturing, shipping, storage, and field operations. With Cortec® products, sensitive equipment is protected against corrosion, thereby extending its life and reducing the cost of expensive repairs.

These websites will show you the in's and out's of products available from Cortec® to meet your needs at a price that can not be compared.
