PRODUCT RELEASE

With CorrTube™, combine corrosion protection and packaging into one simple step.

Cortec® CorrTube™, the premier shipping and packaging tube in the industry can be used to protect, store, or ship raw barstock, cylindrical parts, gears, bearings, and much more simply by using the ideal tube size. This spiral wound tubing is made of neutral natural Kraft linerboard impregnated with Cortec's Vapor phase Corrosion Inhibitor (VpCI®). Once placed inside CorrTube™, the VpCI® inhibiting vapor protects your item by forming an invisible barrier from humidity, SO₂, H₂S, and galvanic corrosion.

CorrTube™ does not contain any hazardous materials such as nitrites, phosphates, or silicates; and is environmentally safe, non-toxic, and biodegradable. This fully recyclable/repulpable; premium corrosion inhibiting packaging and shipping tube provide corrosion protection to both ferrous and non-ferrous metals.
