**PRODUCT RELEASE**

**Cortec's New FlashCorr VpCI® removes salt build-up while protecting from corrosion.**

FlashCorr VpCI® is a non-toxic, environmentally safe cleaner that removes even the harshest of salt build-up from any metal surface. With the addition of Cortec's Vapor phase Corrosion Inhibitor (VpCI®) it protects against corrosion from further salt exposure. FlashCorr VpCI® is a blend of surfactants, chelating agents, and corrosion inhibitors; it is non-flammable, nitrite-free, and will not affect paint adhesion qualities.

Use of this rinsing agent as part of a preventive maintenance program by municipal, state, federal, military, and commercial customers will add years to the useful life of equipment. It can be applied to wheeled/tracked vehicles, boats, ground support/shipboard equipment, salt spreaders, snowplows, blowers, commercial vehicles, machinery, engine blocks, and a variety of other equipment.

- Can be applied using power washers or sprayers.
- Prevents flash rust
- Safe to use on glass and most plastics
- Available in a convenient water-soluble bag delivery system
- Bio-based and Biodegradable
