PRESS RELEASE

Go Greener with Cortec® EcoAir® for FREE!

Cortec® Spray Technologies, a Wisconsin state recognized Greentier Company with over thirty years of experience, has always been at the forefront of green business practices. In order to better serve our customers and the environment, Cortec® Spray Technologies is now offering partners the chance to enhance their business with green technology.

Cortec® will evaluate your current aerosol product and reformulate it to Cortec's patented EcoAir® System that's propelled with compressed air versus flammable or expensive propellants and here's the best part – it's FREE! For over a decade Cortec® has offered aerosol-alternative formulations that do not have a negative impact on the environment or sacrifice product performance. Using the EcoAir® system will eliminate environmental concerns, alleviate hazardous airfreight restrictions, as well as reduce freight costs.

Cortec® has a complete stock line of biodegradable products that can be distributed as is, co-formulated by our lab with your product, or contracted and marketed as a private label product. Cortec's research & development laboratory is ISO 17025 certified and offers an extensive high tech testing facility. Cortec® also offers world leading corrosion inhibiting additives to add value to your products for your customers.

See link for the EcoAir® technology at:
