PRESS RELEASE

Cortec® is proud to announce the ISO/IEC 17025:2005 accreditation of Cortec's Laboratory by the Laboratory Accreditation Bureau.

Cortec's Laboratory, located in St. Paul, MN, has been in operation for over 20 years, and has dedicated its time to providing customers worldwide with a variety of testing; including analytical, electro-chemical, and corrosion analysis. With this accreditation, Cortec® can further its commitment to provide customers with quality management systems, administrative, and technical operations. This accreditation confirms the competence of Cortec® Laboratory.

ISO/IEC 17025:2005 specifies the general requirements for the competence to carry out tests and/or calibrations, including sampling. It covers testing and calibration performed using standard methods, non-standard methods, and laboratory-developed methods.

ISO/IEC 17025, initially issued by the International Organization for Standardization in 1999 and revised May of 2005, is the main standard used by testing and calibration laboratories. The standard itself comprises five elements that are Scope, Normative References, Terms and Definitions, Management Requirements, and Technical Requirements. Laboratories use ISO/IEC 17025 to implement a quality system aimed at improving their ability to consistently produce valid results.

Laboratory Accreditation Bureau, a Michigan corporation, was established to provide laboratory accreditation services to independent and captive, testing and calibration laboratories across North America. Laboratory Accreditation Bureau conforms to ISO/IEC 17011 in assessing and accrediting laboratories to ISO/IEC 17025.
