PRODUCT RELEASE

Cortec® MCI®-2018 V/O; Creating a Strong Bond for Corrosion Protection!

Introducing MCI®-2018 V/O from Cortec® Corporation a higher viscosity version of MCI®-2018 sealer for vertical and overhead applications. This line of water repellants is 100 percent active silane. MCI®-2018 V/O works by chemically reacting with concrete surfaces to form a strong bond with the substrate. The product creates a hydrophobic layer that repels water and keeps chlorides out without affecting the moisture vapor transmission of the concrete. The Migratory Corrosion Inhibiting (MCI®) molecules contained in MCI®-2018 V/O penetrates the pores to adsorb on underlying metal reinforcement and protect from corrosion. MCI®-2018 V/O has been tested by AMEC Laboratory and is certified to comply with Alberta DOT standards for type 1B and 1C penetrating sealer.

Cortec's MCI®-2018 V/O is easy to apply to bridge supports, garage pillars, or building walls without wasting product through spillage.

MCI®-2018 V/O can be spray, brush, or roller applied. The increased viscosity of MCI®-2018 V/O makes it easy to apply the sealer to bridge supports, garage pillars, or building walls without wasting product through spillage. MCI®-2018 V/O also dries without affecting the appearance of the surface.

Cortec® Corporation is a world leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Our relentless dedication to sustainability, quality, service, and support is unmatched in the industry. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 & ISO 14001:2004 Certified.
