PRODUCT RELEASE

Cortec's MCI® Wall Defense is tough enough to face Mother Nature and vandals.

When it comes to protecting the nation's roadways, bridges, railcars, and other publicly and privately owned spaces from painted vandalism, it is no surprise that the best means of protection is Cortec's MCI® Wall Defense.

MCI® Wall Defense is a clear, silicone elastomer based anti-graffiti coating that can be applied to exterior concrete, masonry, or metal surfaces. It is designed to be used over various types of surfaces that are coated or uncoated. This permanent coating does not need to be reapplied after graffiti removal like alternative sacrificial systems. However, MCI® Wall Defense can be recoated over itself, while other coatings, tagging, or graffiti will not stick. MCI® Wall Defense resistance starts to work 24 hours after coating.

FEATURES

- Excellent exterior durability
- Breathable
- Repellent type
- VOC Compliant
- High UV Resistance
- Excellent gloss retention
- Elastomeric properties
- Hydrophobicity

MCI® Wall Defense may be applied by spray, brush, or roller. A film thickness of 12-15 dry mils (300-375 microns) is recommended. The coating dries to touch in 2 hours. Any tagging is removed with a cold water pressure cleaning of ~ 1200 psi; no special cleaning agents are needed.
