### **PRESS RELEASE**

## **Cortec's Bio-Based Scale and Corrosion Inhibitor S-14 Bio Now In A Powder Formulation.**

Cortec's S-14 Bio Powder anti-scaling, corrosion inhibitor for cooling towers and open loop recirculating cooling systems offers excellent protection in a non-toxic, non-hazardous, and biodegradable package. S-14 Bio Powder is water soluble, compatible with common water treatment programs, and easy to formulate in a variety of open loop formulations.

Cortec's S-14 Bio Powder is a rare combination of a powerful scale inhibitor and multi-metal corrosion protection. In contrast to other commonly used antiscalant products such as phosphonates and poly acrylates, S-14 Bio Powder is an effective scale inhibitor which will not attack steel or aluminum and protects galvanized steel. It is comprised of readily sustainable biodegradable ingredients; its main component being a low molecular weight natural polymer and all the other components are GRAS (Generally Recognized as Safe) substances and food approved preservatives.
