PRESS RELEASE

Cortec Proven Preservation Solutions are Trusted Globally to Protect Idle Assets During Storage, Lay-up, and Mothballing

Whether you are storing a single gearbox for a few months or shutting down an entire production facility, Cortec® can help preserve your valuable property with any combination of our technologies. Cortec® is trusted globally to work directly with your facility and supply chain – Freight Forwarders, EPCs, Contractors, OEMs – to ensure proven protection and 100% zero defect.

- Cortec's **FREE** Mothballing Handbook® – A concise guide for the preservation of a full range of equipment. In the manual, you will find precise preservation specifications including step-by-step instructions for all types of equipment. Additionally, Cortec® has included approval documents, case studies, and test reports for easy reference. The Mothballing Manual is available through the company's website located at <http://www.cortecvci.com/Publications/Lay-Up/mothballing.php>. Simply create a login and password to create your account and access this invaluable resource; or contact samples@cortecvci.com for a CD version.
- Cortec® Corrosion Engineering and Field Services (CEFS) group is focused on providing each customer with optimum solutions to meet their needs. CEFS is comprised of internal Cortec® resources, plus a substantial group of experts available through Cortec's well developed, worldwide group of licensed distributors and contractors. The scope of services for Cortec's CEFS include a variety of design, engineering, and field applications to service customers worldwide. CEFS is committed to providing a cost effective service designed to ensure our customers

receive the correct products, technologies, and applications the first time, every time.
Visit CEFS for more information: <http://www.corteccefs.com/>

- Cortec® Vapor phase Corrosion Inhibitor (VpCI®) and Migratory Corrosion Inhibitor (MCI®) solutions offer customers the ability to preserve valuable and integral equipment from deterioration while remaining economically viable. Many of the world's largest and most respected global companies have relied on Cortec® products for decades, including mines, refineries, mills, and factories. Learn more about VpCI® at <http://www.cortecvci.com/index2.php> and MCI® at: <http://www.cortecmci.com/>.

As always, Cortec® is committed to quality and excellence. We have experts stationed worldwide, ready to offer full-scale recommendations, application assistance, and technical support.

Cortec® Corporation is the global leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Our relentless dedication to sustainability, quality, service, and support is unmatched in the industry. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 & ISO 14001:2004 Certified.
