## Cortec's EnviroSafe Contact Cleaner Protects Electrical Components

EnviroSafe Contact Cleaner is formulated specifically for precision cleaning and degreasing of electrical contacts, switches, relays, and electrical controls in electro-mechanical assemblies.

It is non-flammable, fast acting and drying; also noncorrosive, non-conductive, and safe for sensitive metals. Powerful spray stream removes dust, dirt, oil, grease, and oxides leaving no residue after evaporation.

This product is intended for industrial and/or professional applications only.

EnviroSafe Contact Cleaner has low Volatile Organic Compounds (VOC); chemicals that can cause various health problems. Low-VOC products have much lower VOC content than conventional products and can contribute to the LEED rating system.

Electrical contact cleaner is simply compressed air with a cleaning agent that evaporates, such as isopropyl alcohol. It is useful for cleaning electric components that have food, grease, or oils on them; and can be used for plastics under typical cleaning conditions. It can dislodge foreign elements and clean components.

Please contact Cortec® for more information on EnviroSafe Contact Cleaner or any of our other corrosion combating technologies.
