

PRODUCT SPOTLIGHT

PTC Emitters offer superior corrosion protection in breathable pouch!

Cortec® Corporation's PTC Emitters are constructed from breathable Tyvek® which allows for an efficient, clean, dry, and easy method of corrosion protection. The unique construction of PTC Emitters allows Vapor phase Corrosion Inhibitors (VpCI®) to be emitted through the Tyvek® pouch. The inhibitor can then form a protective layer on metallic surfaces and recessed areas, providing corrosion protection to both ferrous and non-ferrous metals.

PTC Emitters are ideal for the protection of bridge tendons, post tensioning cables, tubular structures, as well as parts and equipment during shipment and storage. PTC Emitters are available in two stock sizes, 6"x7" and 6"x10", for the protection of 1m³ (35 ft³) and 3m³ (106 ft³), respectively, and are packaged 50 pouches per carton.

Please contact Cortec® for more information on PTC Emitters or any of our other corrosion combating technologies.

Tyvek® is a registered trademark of DuPont.

Cortec® Corporation is a world leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 & ISO 14001:2004 Certified.
