

# PRODUCT SPOTLIGHT

## For Indoor Corrosion Prevention, Use Cortec's VpCI®-377.

Cortec's EcoAir® VpCI®-377 is a water-based corrosion preventative for indoor protection of equipment and components in our patented, environmentally friendly compressed air cans. It has been designed to replace oil-based products and meets tough anti-pollution requirements. It forms a clear, dry, hydrophobic film to protect and prevent your parts, castings, pumps, housings, and equipment from corrosion. The vapor phase action protects even uncoated surfaces and difficult to reach areas.

EcoAir® VpCI®-377 is water-soluble, environmentally friendly, non-flammable, and is easy to apply. It is free of hazardous amines, nitrites, and phosphate esters. It does not need to be removed, but if necessary, clean with alkaline cleaners such as Cortec's VpCI®-410 Series. It can also be coated with conventional paint systems.

VpCI®-377 is also available concentrated in larger sizes with a wide water dilution range (0.5 - 20%) for use in dip, parts washers and rinse tanks, hydroblasting, and hydrotesting.

Please contact Cortec® for more information on EcoAir® VpCI®-377 or any of our other corrosion combatting technologies.

Cortec® Corporation is a world leader in innovative, environmentally responsible VpCI® and MCI® corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Headquartered in St. Paul, Minnesota, Cortec® manufactures over 400 products distributed worldwide. ISO 9001 & ISO 14001:2004 Certified.
