

PRODUCT SPOTLIGHT

Cortec® VpCI®-411, a clean alternative to hazardous degreasers.

Cortec® VpCI®-411 is a heavy duty cleaner/degreaser for commercial and industrial applications. It is extremely effective at removing grease, oil, paraffin, and wax. Unlike other industrial solvents, VpCI®-411 is non-hazardous, biodegradable, and gives off a pleasant scent. Because of its ability to work at a wide range of concentrations, Cortec® VpCI®-411 can tackle many cleaning or degreasing tasks. At low concentrations VpCI®-411 is safe enough for washing oil and grease off hands and at the highest concentrations, strong enough to remove oil deposits from machinery. Cortec® VpCI®-411 gives the degreasing power needed to break through industrial grime and oil without risk to the environment.

Applications

- Heavy Duty Machinery
- Shop Tools
- Hoods
- Office Equipment
- Removing Adhesives
- Removing Other Cortec® Temporary Coatings
