

PRODUCT SPOTLIGHT

Multi-Purpose VpCI[®]-422 for Rust Removal.

BEFORE

AFTER

Cortec's VpCI[®]-422 is an environmentally friendly, cost effective alternative for removing corrosion. Comprised of 100% biodegradable, organic compounds allows for easier disposal depending upon the amount of pollutants introduced into the solution. VpCI[®]-422 is simple to use; simply spray or dip, allow rust to dissolve, then rinse with an alkaline solution (Cortec[®] VpCI[®]-410 series). The amount of time required depends on the severity of the corrosion. VpCI[®]-422 can be utilized to remove rust stains from a variety of surfaces such as wood, plastic, and painted surfaces without causing an adverse effect*.

Unlike conventional rust removers, VpCI[®]-422 is a citrus based rust remover, which is non-toxic and non-flammable. In contrast to harsh industrial chemicals, VpCI[®]-422 can be used in manufacturing with no adverse affect on production personnel.

Cortec's VpCI[®]-422 passes ASTM F-519-05 test "Mechanical Hydrogen Embrittlement Evaluation of Plating/Coating Processes and Service Environments"

TYPICAL APPLICATIONS

- In-process rust removal for parts and metal stock.
- Interior and exterior surfaces of tanks and vessels.
- Outdoor machinery and equipment.
- Trucks, cars, and other vehicles.
- Automotive, marine, farm parts, and equipment.
- Fences, railings, and walls.
- Tools, locks, and rust-frozen parts.

BEFORE

AFTER

Cortec[®] continuously strives to improve the environmental performance of our products and processes to provide a better world for future generations. The cornerstone of Cortec's history and future is based on the production of cost effective, superior products to protect metals from corrosion. Cortec[®] products exemplify our long-standing commitment to conserve our natural resources.

Please contact Cortec[®] for more information on VpCI[®]-422 or any of our other corrosion combatting technologies.

*Testing should be done to ensure compatibility.

Cortec[®] Corporation is a world leader in innovative, environmentally responsible VpCI[®] and MCI[®] corrosion control technologies for the Packaging, Metalworking, Construction, Electronics, Water Treatment, Oil & Gas, and other industries. Headquartered in St. Paul, Minnesota, Cortec[®] manufactures over 400 products distributed worldwide. ISO 9001 & ISO 14001:2004 Certified.
