Cortec® VpCIs give you the green chemistry building blocks to stop scale and corrosion during system operation. VpCIs can be added as a liquid or powder to your current treatment program and formulations. They're ideal for both closed and open loop systems, providing a complete inhibitor package for multi-metal protection and scale inhibition. Cortec® VpCIs replace molybdate, nitrites, amines, phosphates, azoles, and other corrosion and scale inhibitors. Also, ask about our new green bio-dispersant

## CASE HISTORY:

### Round Butte Reservoir Preservation

Salmon fingerlings were getting too warm when being transferred from the hatchery to open water in the reservoir. A floating structure was created to pump cold water from the reservoir bottom to cool the young fish. The structure sits on large steel flex-floats that are air tight, but...
